## 📁 PROJECTS

### E Commerce

A fully MERN-based e-commerce website offering a seamless shopping experience with MongoDB for data storage, Express.js for the backend, React for the front end, and Node.js for server-side operations.

### Todo List

A list can add, delete, and update data. When checked, it is marked as finished and only appears when 'show finished' is clicked. Data is stored upon each rendering.

### Password Manager

The Password Manager is a secure web app built with Tailwind CSS, HTML, React, Express.js, and MongoDB, featuring user authentication, encrypted password storage, and a user-friendly interface for managing passwords efficiently.

### Food Reservation

A fully MERN-based e-commerce and food reservation platform with client feedback forms, prioritizing favorite dishes, and featuring search, filter, and sort by categories functionalities for an enhanced user experience.

### Guess the Number

A Java-based random number guessing game where the user attempts to guess a number between 1 and 100. The program provides feedback on each guess, whether too high or too low until the correct number is guessed.
